Distributed Decision Support Services and Knowledge Management Repository

**Naval Health Research Center and U.S. Army Medical
Research and Materiel Command (USAMRMC),
Telemedicine and Advanced Technology
Research Center (TATRC)**

Distributed Decision Support Services and Knowledge Management Repository project (DDSS-KMR) leverages the open source CONNECT architecture and provides additional capabilities for delivering the data and services required for sophisticated real-time clinical decision support. DDSS-KMR will be demonstrated using live reference information systems from the VA (VistA), the Indian Health Service (RPMS), and the open source community (Open Vista). EMR clients using each system have been modified to now include the project's Universal Inbox, a reusable module providing a centralized clinical decision support workflow sensitive environment.
