Health Information Technology

Standards & Interoperability Framework

Office of the National Coordinator for Health IT (ONC)

During this demonstration, participants will learn about the Standards & Interoperability Framework. This framework consists of a team of experts collaborating with ONC to support the development of healthcare specifications in order to facilitate wider use of health IT standards and to increase the level of interoperability across the nation. The demonstration will describe each part of the framework and how all the parts interrelate. Participants will learn of opportunities to help shape health IT interoperability for the future by becoming involved in these critical efforts.
