

**interoperability  
showcase™**

**NACCHO**  
National Association of County & City Health Officials

**W**atch and learn at the [HIMSS Interoperability Showcase™](#) live demonstrations of standards-based health information exchange showing how these transactions bring critical information to the right people at the right time. This collaboration with NACCHO and the CDC will demonstrate how seamless health information exchange in public health can contribute to improve outcomes, engage consumers, and support regulations. Connect with our experts and learn more about what standards-based interoperability can do for you. For more information, check the conference app.

Each tour will visit various clinical settings to experience the high-tech, secure exchange of electronic health information that eliminates the need for redundant information capture and data entry. Bi-directional interoperability enables public healthcare plan recommendations to be incorporated at the right time and place to have a vital impact on patient care and to improve community wellness.

## Use Cases

- ▶ Birth Reporting
- ▶ Death Reporting: Opioid and Infectious Disease Monitoring
- ▶ Electronic Case Reporting
- ▶ Oral Health Referral
- ▶ Immunization Integration
- ▶ Diabetes Case: Work, Diet, and Health
- ▶ Cancer Reporting to Public Health
- ▶ HIV Aggregate Data Exchange
- ▶ Opioid Prescription Monitoring
- ▶ Disaster Preparedness

**Sign up near the Registration Desk for one of our tours!**

# Demonstration Schedule
